

From Quartz process tubes to quartz gas injectors, our innovative designs will meet your most exacting requirements. CVD Equipment provides you with high quality quartz products and superior service. Our high purity, clear fused quartz product line is the result of years of precision engineering and custom fabrication experience. Whether you're in the market for standard or custom fabricated quartzware, our capabilities in machining, grinding, polishing, fusing, and glass blowing, makes CVD Equipment the clear choice.

We also offer repair services to provide you with complete one stop services.

Many industries benefit from CVD Equipment's capability for high quality fabricated quartzware, competitive prices, and prompt delivery. One of our most important and productive relationships has been with the semiconductor industry. Microelectronics manufacturing requires contamination-free handling systems, and CVD

Equipment is especially proud to be a major supplier of high purity quartz materials and products to semiconductor companies worldwide.

CVD Equipment's Computer Aided Design (CAD) Systems help to crystallize your ideas and sketches into finished working drawings. Our experience in the manufacturing of Furnaces and Chemical Vapor Deposition (CVD) equipment helps us give you the solutions you need for your critical projects.

At CVD Equipment, we want to improve your process and production with our products.

Call us at 631-981-7081 or email us at [info@cvdequipment.com](mailto:info@cvdequipment.com) TODAY and tell us what you need -- we will exceed your expectation.

The following is a partial list of the Quartzware products we manufacture:

- Bell Jars
- Hot Wall Process Tubes
- Double Walled Water Cooled Process Tubes
- Wafer Boat Carrier
- Substrate Holders
- Gas Injectors
- Shower Heads
- Push/Pull Rods
- Thermocouple Sheaths
- Sleds
- Crucibles
- Discs
- Bubblers
- Boat Holders
- Thermal Baffles
- Custom Designs
